ESTABLISHED 1922

HARDY PLANTS FOR THE NORTHWEST

BROOKINGS, SOUTH DAKOTA

CARL A. HANSEN, SOLE OWNER

Niels Ebbesen Hansen Paul Robert Hansen Carl Andreas Hansen

Paul, my son, though less than two years old has already shown a great adaptation for plants, being very fond of fruits of practically every kind and loves to be out among the flowers and trees in the nursery. We all have hopes that Paul will be the greatest plant man of us all. There is another picture of Paul on the front cover page in the center, standing in front of a Siberian Flowering Almond bush and holding out a sprig of flowers toward you. This picture was taken last spring when Paul was just about one year old.

Prof. N. E. Hansen, who is my father, is head of the Department of Horticulture at South Dakota State College, and is not connected in any business way with my nursery. Though naturally, because of our relationship, he has always been a great inspiration to me. Yet leaving out any personal sentiment, one cannot but help feeling the thrill of his greatness, after hearing the constant praise and good results of his introductions in so many different localities. And to repeat only what others say. Prof. N. E. Hansen has introduced more worth while plant improvements for the northwest than any other man.

His improved plant introductions have added many millions of dollars to the value of land in the northwest and have made it possible and profitable to farm and raise fruit where before were it not for improved plants, human existence in some cases would have been practically impossible.

Yet the important fact is that he has thousands of experiments and improvements in plants still to come if he is helped in the right way. It is hoped that everyone will co-operate in every way possible to hurry these great experiments to completion, so that the world may fully realize on Prof. N. E. Hansen's great work. It is well to remember that geniuses do not live forever and no one can rightfully complete after he is gone the many great experiments that Prof. N. E. Hansen has started. The world has made too many mistakes in the past in not helping great men when they should have helped. It is up to us as a State and Nation to aid in this great work all we can, by appropriations, giving all the land that Prof. N. E. Hansen needs for his experiments and by personal endeavor and assistance in the matter. Prof. N. E. Hansen has already introduced many great improvements in the plant lines but his dreams and plans and experiments for still better plants, are still part of his unfinished work. As a direct help to everyone as well as to ourselves, for a finer world of fruits, flowers, and homes, let us help in the great work all we can.

Carl A. Hansen

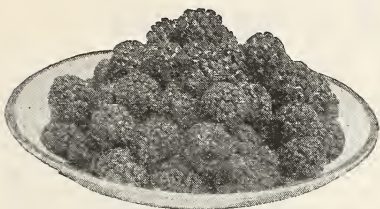

— TERMS —

Cash with order or 25 per cent down and the balance on delivery. Remittance may be made the most convenient way, however checks, money orders and bank drafts are the safest. All shipments F. O. B. here and are sent forward the cheapest and quickest way unless otherwise directed.

RED SILVER CRAB—A Beautiful Lawn Tree

The First Carl A. Hansen Plant Introduction

It is a rich maroon red from top to bottom, in bark, in branch, and in leaf. The somewhat cut-leaf foliage has in addition a silvery touch underneath, making a remarkable combination thruout the season. Only a very few plants available this year. Price: While They Last, \$5.00 Ea.

Latham Raspberries

SUNBEAM RASPBERRY

The most popular and most famous of Prof. N. E. Hansen's red-raspberry introductions. The fruits are purplish red in color, of large size, excellent flavor and wonderful keeping quality. It is perfectly hardy everywhere in the northwest, bearing heavy annually, and over a long period of time each season so is thus called everbearing by some. Because of its fine flavor, good keeping, and productiveness it makes a splendid berry for the market as well as for home use. Prices: Each, 10c; 10 Plants, 75c; 25 Plants, \$1.25; 100 Plants, \$3.50.

OHTA RASPBERRY

The second most popular of Professor N. E. Hansen's red-raspberry introductions. It is of good color, hardy and prolific. Tho not quite as good a berry as Sunbeam it does somewhat better in more rigorous climatic and soil conditions. Prices: Each, 15c; 10 Plants, \$1.00; 25 Plants, \$1.75; 100 Plants, \$4.50.

LATHAM RASPBERRY

Generally considered the best market berry because of its enormous size and good color, its fine flavor and extra heavy bearing. But because of its pedigree and susceptibility to Mosaic it is not as hardy and disease-resistant as Sunbeam or Ohta. Prices: Each, 20c; 10 Plants, \$1.50; 25 Plants, \$2.00; 100 Plants, \$5.00.

STRAWBERRIES

PROGRESSIVE EVERBEARING—The very best all around of the everbearing varieties. A good producer of fine large berries of excellent quality from early spring till late fall. Prices: 25 Plants, \$1.00; 100 Plants, \$3.50; 500 Plants, \$10.00; 1,000 Plants, \$15.00.

SENATOR DUNLAP—No doubt the very largest and best of the June bearing varieties. Prices: 25 Plants, 75c; 100 Plants, \$2.00; 500 Plants, \$7.50; 1,000 Plants, \$10.00.

MASTODON EVERBEARING—The Biggest and Best of the recently introduced strawberries. A tremendous bearer and very sweet. Prices: 25 Plants, \$1.50; 50 Plants, \$2.50; 100 Plants, \$4.00.

RHUBARB

VICTORIA — The sweetest and best of them all. A vigorous grower of rich red, stems of extra fine quality. Prices: 15c Each; 10 Large Roots, \$1.15; 25 For \$2.50.

ASPARAGUS

The earliest and best green of the garden. Contains those proper vitamins one needs to remain in good health. Fine, large succulent stalks can be cut from early spring till late fall if the bed is properly mulched and cared for. Prices: 2 Year Heavy, Large Roots, 25 for 75c; 50 For \$1.35; 100 For \$2.50; 500 For \$7.50; 1,000 For \$12.50.

Hansen Grapes

The New Hansen Grapes

Hardy—Large—Productive—Fine

Several years ago Prof. N. E. Hansen of the South Dakota State College at Brookings, again startled the world by introducing a remarkable collection of 32 new grapes which had the hardiness of the wild grape, and were in flavor comparable to the Concord and the best cultivated grapes of Europe. There is no doubt at all but that many of these grapes will attain world fame and be propagated by the millions, as many of his other introductions have been. However, due to the past several years of dry weather and bad growing seasons, the propagation of these remarkable wonders has been extremely slow. Now propagation of them in vast numbers is under way and in a few years we hope to be able to offer them in quantity, altho just now we can't. We have, however, a few to the lucky ones who will order early. So while our very limited supply lasts we offer to you a few of the choice varieties of our selection at the following prices: **Large, Well Rooted Plants, With Long Vines: \$1.50 Each; 3 For \$4.00; 6 For \$7.50; 12 For \$12.50.**

BETA GRAPE—The best known and hardiest of the popular grapes. Producing amazingly large crops of fine large fruit which are good eating and make excellent preserves, splendid jelly and tasty grape juice. Prices: 20c Each; 5 Vines, 85c; 10 Vines, \$1.50; 25 Vines, \$3.00; 100 Vines, \$10.00.

choice plants to offer we offer to you a few of the choice varieties of our selection at the following prices: **Large, Well Rooted Plants, With Long Vines: \$1.50 Each; 3 For \$4.00; 6 For \$7.50; 12 For \$12.50.**

Carrie Gooseberry

ELDORADO BLACKBERRY—Are the hardiest, biggest, and best of all blackberries and enormous yielders. Prices: Each, 20c; 10 For \$1.00; 25 For \$2.00.

LUCRETIA DEWBERRY—Plant is similar to a blackberry but trails on the ground. Hardest of the dewberries. Fruit very sweet and gets to be over two inches long. Prices: Each, 15c; 10 For 90c; 25 For \$1.75.

Hansen Black Currant

have been more or less unobtainable here, due to the fact that the Black Currants of Europe are not hardy here. But now Prof. N. E. Hansen has improved and perfected the Siberian Black Currants till they are equal in quality and flavor to the European Black Currants and are hardy everywhere in the Northwest. Prices For Large, Strong Stocky Plants: Each, 25c; 2 For \$1.00; 10 For \$1.75; 25 For \$2.50.

Hansen Hardy Pears

**Hardy — Productive — Blight-Proof
Good**

These pears were introduced from Siberia by Prof. N. E. Hansen and improved by him. They are perfectly hardy anywhere in the Northwest, free from disease and resistant to fire blight, the dreaded disease of the standard varieties. Fruit is of good size and sweet eating, cooks up well and preserves nicely. Trees grow rapidly and are very sturdy. Pear production has just commenced in the northwest and it is an honor to be among the first to start their culture in each community. As our stock of these is quite limited it would be well to order early and avoid disappointment.

3-4 Ft. Trees: Each 75c; 3 For \$2.00; 12 For \$6.50;
25 For \$10.00.

4-5 Ft. Trees: Each \$1.25; 3 For \$3.50; 12 For \$10.00;
25 For \$17.50.

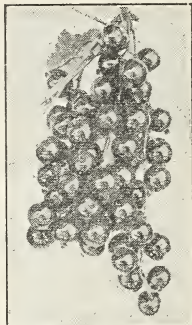

CARRIE GOOSEBERRY

The Leading Gooseberry for the Northwest.

A popular variety of real worth. One of the hardiest, healthiest, and most productive gooseberries grown. The plant is a very vigorous grower, which helps it to carry its large crops of fruit without injury to the plants. The stems are nearly thornless which is an advantage when it comes to picking the fruit. The berries grow to a fine large size, are light red in color and have a pleasing flavor. Every home gardener or commercial fruit grower should be sure to have ample stock of Carrie Gooseberry. Prices: For Strong 2 Year Plants: Each, 25c; 10, \$2.00; 25, \$3.50.

PERFECTION CURRANT

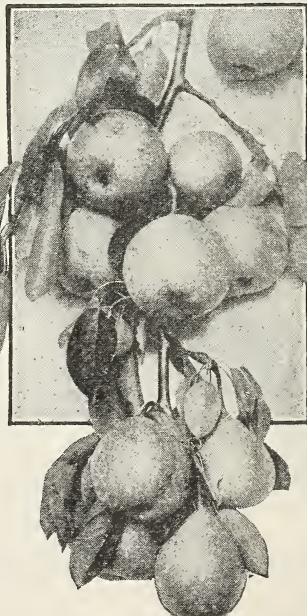

A very good general purpose currant. The fruit has a very fine sweet flavor, is of good size, few seeds, and is borne in large clusters of bright red fruits, and bears prolifically. The bush is upright in habit, vigorous and quite hardy throughout the northwest. Prices: Each, 35c; 10 For \$2.50; 25 For \$4.00.

Perfection Currant

HANSEN IMPROVED SIBERIAN BLACK CURRANT

The best currant for the Northwest. Hardy everywhere. Very vigorous. Fruits of enormous size, black-red inside and out, and of a particular sweet mellow desirable taste. Excellent for cooking or eating, and makes wonderfully colored dark rich red jam, jelly, or sauce of superb flavor and beauty. Black Currant preserves are considered by many of the Royalty of Europe to be one of the perfections of preserves in flavor and quality. Therefore they

Hansen Pear

OKA CHERRY

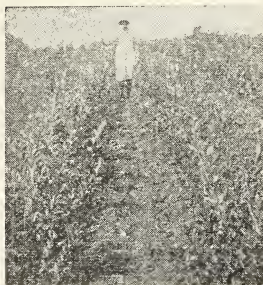

DWARF HABIT
EARLY BEARING
LARGE FRUIT
!!PROCLAIMED THE GREATEST!!

The many who have already had the opportunity to taste this wonderful plum-cherry hybrid of delicious sweetness proclaim it by far the best they have ever tasted. Prof. N. E. Hansen, the originator, himself considers Oka Cherry the best plum-cherry hybrid he has introduced to date.

DELICIOUS FLAVOR!

Latest and Best Extra Fine

One of Prof. N. E. Hansen's latest cherry-plum introductions and considered his best so far. It is a sand cherry hybrid grown from seed of the Champa. The fruit is rounder than Sapa and has a somewhat brighter skin color, which is a rich dark, purplish red. The flesh color is a rich, intense, purplish black red. It is in all a very remarkable plum to look at and surely a delight to eat. Jelly and jam made from Oka Cherries are equally good.

Dwarf and Bushy

Dwarf and Bushy Very Sturdy

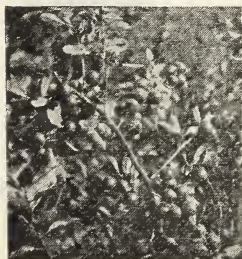

The tree of Oka has a dwarf bushy habit and bears from the ground up. This remarkable feature is of unique value when harvesting the fruit. No need for a stepladder for all the fruit is within easy reach. But the dwarf size in no way indicates the size of the crop of cherries. For the strength of the plant goes into fruit production and not into surplus tree growth, and so consequently the limbs and branches burden themselves with fruit. The leaves are small, sort of a pointed oval shape, and a bright, shiny green color.

Prolific

The buds come in groups of three and are rather closely set together on the branches. Thus in a good fruit year at each bud group are two cherry-plums and one leaf, making the branches an almost solid mass of fruit.

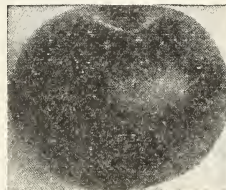

Early Bearing—Very Hardy

Oka Cherry like the other of Professor N. E. Hansen's sandcherry hybrids bears extremely early,—always, if the season is at all favorable, the year after planting. Oka is an annual bearer and hardy thruout the northwest prairies. It is indeed an extraordinary cherry-plum to which too much praise cannot be given.

Bears Very Heavy

PRICES:

Per Tree, 75c; Three Trees, \$2.00;
Six Trees, \$3.50; Twelve Trees, \$6.50;
Twenty-Five Trees, \$12.50.

Large And Fine

Tom Thumb Cherry

Quite similar to Oka Cherry, tho of more dwarf habit and more for the far North. Prices: \$1.50 Each, 3 Trees, \$4.00.

SPECIAL! Selected Extra Large Size Specimen Trees Of Oka Cherry Which Are Ready To Bear A Good Crop Of Fruit This Year. One Tree, \$1.25; Three Trees, \$3.50; Six Trees, \$6.50; Twelve Trees, \$12.00.

Opata Plum

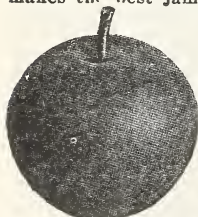

chard to insure having a large crop of fine plums thruout the season.

OPATA PLUM—Earliest plum of all and foremost everywhere for its wonderfully rich and delicious flavor. Bears the year after planting and annually thereafter.

SAPA PLUM—Early, large, productive, and very hardy. Fruit is very sweet to eat fresh, with flesh of an intense purplish red color which makes it wonderful for preserves and jam.

WANETA PLUM—The biggest of the Hansen Hybrid Plums and a giant of all hardy plums. Gets to be over two inches in diameter. Richly flavored flesh with a highly colored red skin. An enormous yielder.

HANSKA PLUM—Has a superb apricot flavor and fragrance. Many claim makes the best jam of any plum. Has a bright colored orange red skin and yellow flesh.

Hanska Plum

SELECTED POLLENIZER PLUMS—No plum orchard is complete without them and you can expect no great crop unless you have some of these planted among the rest of your plum trees. They will make a big crop bigger, and a fine crop finer. Every plant or animal needs good sires if they are to get the right start in life and unless you furnish the proper sires for your plums you will not get the best setting of fruit. These plums have been selected because of their abundant production of good pollen which will aid the setting of fruit, and because they are productive, hardy, and have fruit of good size and flavor.

Waneta Plum

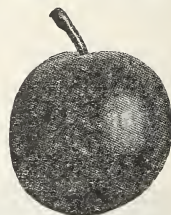

SPECIAL NEW REDUCED PRICES ON OPATA, SAPA, WANETA AND HANSKA

Large Size—4 to 6 Ft. Each.....65c; 3 For \$1.75; 12 For \$6.50; 25 For \$11.50

Sapa Plum

Other Hansen Plums of Fine Quality

SANSOTO PLUM—Similar to Opata, but later. **CHERESOTO PLUM**—Sweet, mid-season. **KAHINTA PLUM**—Like Waneta but a more consistent bearer. **KAGA PLUM**—Like Hanska but free-stone. **TOKATA PLUM**—The best in flavor and fragrance of all Hansen Plums. **TOKA PLUM**—Very firm and fine, keeps well. **TAVENA PLUM**—Similar to Waneta and Kahinta but the best all around of the three. **ASSINIBOIN PLUM**—The Waneta Plum for the North. **PEMBINA PLUM**—The best all around plum for Canadian conditions. Prices: \$1.00 Per Tree, 12 Trees For \$10.00.

SPECIAL COLLECTIONS OF PLUMS, APPLES and CRABS

Experimentation has proved that mixed plum and mixed apple orchards unquestionably bear best, due to the cross pollinization. And as we are so often called upon to make up a good assortment for a home orchard, so we are making the following offer on orchard assortments all ready for you. Each assortment will consist of good hardy, choice varieties of the kind of fruit ordered.

Special Assorted Orchard of 6 Plums—Large \$3.00; Small \$1.75

Special Assorted Orchard of 6 Apples—Large \$2.50; Small \$1.50

Special Hansen Home Orchard Assortment of

6 Plums, and 6 Apples and Crabs—Large \$5.00; Small \$2.75

ANOKA—The Wonder Apple

One of Prof. N. E. Hansen's Greatest Introductions

BEARS AT TWO YEARS

HARDY — PRODUCTIVE — GOOD

A MASTERPIECE OF FRUIT BREEDING!

Bears Earliest of All

Anoka has the most remarkable ability to bear on one year wood and annually thereafter. Four year trees have been known to have borne three crops of fruit.

Fine Eating

The size, color, and flavor of Anoka make it a popular favorite. The fruit is good sized, red striped, and comes on early in the season. It is good eating, cooks up well and keeps better than most summer apples.

Very Productive

Anoka is surprisingly productive, often loading its branches till they bend nearly to the ground, yet due to its sturdy habit, seldom breaks under the great weight.

Tree Dwarf

Another remarkable characteristic of Anoka is its dwarf stature, which adapts it nicely to the back yard, and will allow closer planting of the trees in an orchard.

PRICES ON LARGE SIZE ANOKA APPLE TREES

One Tree—\$1.00; 3 Trees \$2.50; 12 Trees \$10.00; 25 Trees \$17.50.

Small Size Trees of Anoka Apple

Prices Per Tree, 50c; Six Trees, \$2.50.

Three Year Anoka Tree Bearing A Good Crop Of Fruit.

Extra Special Offer

Large 3 yr. Anoka
Trees, Ready To
Bear This Year;
\$1.75 Each; 3 Trees
\$5.00; 6 Trees \$8.50.

The Best of Other Apples and Crabs

GOLDO APPLE—A true winter apple for the northwest with the flavor of Grimes Golden and the hardiness of Duchess. Prof. N. E. Hansen's best winter apple introduction.

CHINOOK APPLE—One of the newest of the Prof. N. E. Hansen's apple introductions. Fruit of good quality and size, firm and sweet and keeps well. Has kept 18 months.

DOLGO CRAB—Fruit is conical in shape, of good size, brilliant red in color, and with a delicious juicy, sprightly sweet flavor. Bears very young, and is hardy far north into Canada. Makes bright red jelly.

AMUR CRAB—A most productive fruit. Hardy and free from blight. Fruit of fair size, cooks up well and makes a brilliant red jelly of excellent flavor. Extra fine for pickles.

RED FLESH CRAB—Prof. N. E. Hansen's newest crab introduction that has both a red flesh and skin, giving a very delightful coloring to sauce and preserves made from it. Fruit is of good size and very good eating.

Prices For Goldo, Chinook, Dolgo, Amur and Red Flesh:

Large Size: Each.....75c; 3 Trees \$2.00; 12 Trees \$6.50
Small Size: Each.....50c; 3 Trees \$1.25; 12 Trees \$4.00

We List Other Varieties Of Hansen Apples, Crabs and Plums And If You Wish Any, Send For Full Description And Prices.

WEALTHY APPLE—A long time favorite with all good fruit men. A good eating and cooking, early fall and winter apple.

DUCHESS APPLE—The standard summer cooking apple for the northwest. Bears heavily and annually. Hardy everywhere and very disease resistant.

WHITNEY CRAB—Perhaps the most popular eating crab grown. A good annual producer and hardy. Should be in every fruit orchard.

Goldo Apple

Amur Crab

Wealthy Apple

Prices For Wealthy, Duchess and Whitney.

Large —4 to 6 Feet.....Each 50c; 3 For \$1.35; 12 For \$5.00; 25 For \$9.50
Medium—3 to 4 Feet.....Each 40c; 3 For 1.10; 12 For 4.00; 25 For 7.50
Small —2 to 4 Feet.....Each 30c; 3 For .85; 12 For 3.00; 25 For 5.00

IMPROVED HANSEN BUSH CHERRIES

Easy to Grow—Sure to Produce

Good Flavor—Highly Productive—Hardy Everywhere—Disease Resistant

The Development Of Years

Hansen Improved Bush Cherries are the result of over thirty years of untiring selection work by the great plant wizard, Prof. N. E. Hansen at South Dakota State College, Brookings. He has developed what was formerly the rather small, little known, western South Dakota Sand Cherry, into a fruit of large size, desirable taste, good habits, wonderful bearing, and beautiful in flower, fruit and foliage.

Fruit Of Good Quality

The fruit is good to eat from the bush, is fine in sauce and makes a wonderful jam of the most superb flavor and rich color imaginable. The juice makes splendid jelly and a tasty and not to be forgotten cordial which rarely keeps long.

Grows Bush-Like

Though the fruit of this cherry much resembles a plum in size and shape, the plant itself grows in a bush form, branching and bearing from the ground up. Usually bears the year after planting. It always retains its dwarf stature which is of fine value for planting in the garden, as it doesn't take up near the room of an ordinary plum tree and yet often bears more. The bushes should be planted 2 to 4 feet apart, in rows 4 to 6 feet apart, 25 or more to every home garden.

Beautiful In Plantings

In landscape planting a few of the bush cherries are very desirable as they are dwarf and bushy, and a great aid in foundation covering. While the foliage itself, a beautiful silvery green, turning to a rich red and gold in fall, adds a very desirable color touch to landscape plantings. The profuse masses of white flowers in early spring, completely covering the bushes are a glorious sight. The fruit later is ornamental as well as useful.

Makes A Good Low Hedge

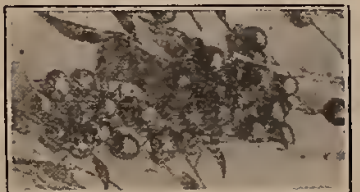

Because of their dwarf bushy habit these Hansen Improved Bush Cherries make a splendid ornamental low hedge for the front lawn, as well as in the garden.

Hardy Everywhere—Disease Resistant

The hardiness of these cherries is unquestioned. They have been used as the sires in a number of Prof. Hansen's introductions, because he knew it would give the new varieties the hardiness they need to withstand the cold and adverse weather conditions we often experience. Their sturdiness and resistance to disease is another outstanding characteristic.

Plant These Hansen Improved Bush Cherries Because:

- 1—They are easy to grow and perfectly hardy everywhere.
- 2—Are good to eat, and make delicious preserves.
- 3—Bear early, heavy, and annually.
- 4—Are dwarf growing and bushy.
- 5—Are excellent for hedges or ornamental shrubs.

Prof. N. E. Hansen Selecting Bush
Cherries

Prof. N. E. Hansen and A May Day Tree

MAY DAY

THE BEAUTIFUL FLOWERING LAWN TREE

For superb flowering beauty on the lawn or boulevard none excels May Day. Its long fine white flowers early in spring create a massive bouquet of loveliness that is alluringly wonderful and altogether lovely.

It is the first tree to show green in spring and is practically in full leaf long before many of the common trees begin to leaf.

The flowers are a wonderment in themselves, blooming early in spring, in April or early May, and always several weeks earlier than any of the other flowering trees. The flowers are large, pure white and very fragrant. Their mass like clusters are a beautiful sight and are well adapted to cutting for the house or early spring lawn festivals.

The fruit of the trees are small and though edible and make good jelly are soon claimed by the birds in preference to what we consider better fruit. Thus, our good fruit is saved, yet the birds are fed.

May Day may be trimmed up for a street or lawn shade tree or left in bush form as shown. It grows rapidly. It is perfectly hardy far north into Canada as it came from the colder parts of Siberia.

Prices On May Day Trees

12-18 Inch	\$0.35 Each; 5 Trees For	\$1.50
18-33 Inch50 Each; 5 Trees For	\$2.00

6-8 Feet.....	\$3.50 Each	8-10 Feet.....	\$5.00 Each
---------------	-------------	----------------	-------------

CHINESE ELM

This remarkable elm for street and lawn is fast becoming the leading Elm thruout America. It grows faster, is more drouth resistant, longer lived, grows larger, and is harder than any other shade or street tree grown. It is much finer than the ordinary Elm. The foliage is fine and feathery, a bright green, and very dense, and the branches make almost right angles with the trunk instead of being in sprays like the common Elm. This tree is sweeping the country like wild fire, the demand is increasing faster than the supply, and it is only by rare good fortune that we are able to offer any at all to you this year. But our supply is limited so order early.

3 to 5 Ft. Trees: Each 50c; 5 Trees \$2.25; 10 Trees \$4.00; 25 Trees \$8.50. 4 to 6 Ft. Trees: Each 75c; 5 Trees \$3.50; 10 Trees \$6.50; 25 Trees \$12.50.

Cistena Purple Leaf Sandcherry

Cistena is the hardiest shrub grown that has red foliage thruout the growing season. Its leaves are a beautiful purplish red all summer. Its blossoms in early spring are a deep pink. Its unique beauty enhances the landscape and it is especially desirable in groups of shrubs to brighten up a dull corner. It was originated by Prof. N. E. Hansen. Prices: 3-5 Ft. Shrubs \$1.50 Each; 2-4 Ft. Shrubs, \$1.00 Each.

HOPA RED FLOWERING CRAB—Prof. N. E. Hansen's red flowered, and red fruited, hardy flowering crab. Especially fine as a specimen ornamental. Price: 3-5 Ft. Trees \$1.50 Each.

NEW ULM BLACK WALNUT—A hardy, large size, Black Walnut from New Uhm, Minnesota, and the hardiest Black Walnut yet introduced. It has been said that much of our future foods will be from nuts as more food value can be raised to the acre with nuts than any other crop. It will be well to get the right start now in a coming new big industry, with the hardest varieties available of a choice food. Prices: Each 50c; 5 For \$2.00; 10 For \$3.50; 25 For \$7.50; 50 For \$12.50; 100 For \$22.50.

Black Hills Spruce

Niobe Weeping Willow

The superb, graceful beauty of the Niobe Weeping Willow is near to the utmost in distinctive specimen ornamental planting. Its beauty is a continual joy. In winter and summer its graceful branches sway in the slightest breeze and wave their beauty to all. Professor N. E. Hansen introduced Niobe Weeping Willow from the colder parts of Europe and so it is perfectly hardy far north in Canada.

PRICES:

3-5 Ft. Trees 50c Each.
4-6 Ft. Trees 75c Each.
5-7 Ft. Trees \$1.00 Each.
Three For The Price Of Two.

CUT LEAF WEEPING BIRCH—One of the prettiest specimen ornamental trees grown. With fancy cut leaf foliage, and gracefully drooping limbs. Price: 4-6 Ft., \$1.75 Each.

Niobe Weeping Willow

Choice Black Hills Spruce

The stern, steadfast, lasting beauty of the Black Hills Spruce is really not found in any other tree. They are beautiful thruout the year and give continuous and lasting enjoyment. Hardy everywhere and tho not as fast in growth as other trees, last beyond a life-time.

PRICES FOR BAILED AND BURLAPPED, CHOICE SPECIMEN STOCK:

12-18 Inch—\$1.50 Each; 3 For \$4.00; 5 For \$6.50; 10 For \$11.50.

18-24 Inch—\$2.00 Each; 3 For \$5.00; 5 For \$8.00; 10 For \$15.00.

Seedlings For Windbreak: 4-6 Inch—25 For \$1.50; 100 For \$4.00; 1,000 For \$35.00.

AMERICAN ELM—3-5 Ft. Each 25c; 5 For \$1.00; 10 For \$1.75. 4-6 Ft. Each 35c; 5 For \$1.50; 10 For \$2.50; 100 For \$22.50.

GREEN ASH—3-5 Ft., Each 35c; 5 For \$1.50; 10 For \$2.50. 4-6 Ft., Each 50c; 5 For \$2.00; 10 For \$3.50; 100 For \$30.00.

FIELD SEEDS

We are giving herewith a list of the various field seeds that we handle. Prices are for freight prepaid within 500 miles, subject to prior sale, and to change without notice. All seeds are good, well-cleaned and of choice quality. Free samples gladly sent upon request.

A Low Flowering Hedge

Siberian Flowering Almond

A Glorified Shrub Of Alluring Loveliness

The Hardest Dwarf Ornamental

The Siberian Flowering Almond is a beautiful, dwarf, lawn shrub which Professor Hansen thinks is destined to great popularity. It is perhaps the hardest of dwarf ornamentals as it is native of an 8-inch rain fall country with the temperature ranging from 50° below zero in winter to 106° above in the summer. It is capable of

defying the most severe weather conditions thruout the northwest. It is hardy without the slightest winter protection whatever, on the driest uplands of our western states and many hundreds of miles north into Canada.

Earliest Shrub to Bloom in Spring

Siberian Flowering Almond is the earliest shrub to bloom in the spring. Before the other shrubs are out and its own leaves appear, it is covered with abundant bright rose-pink, fragrant flowers. It remains a beautiful mass of blooms for nearly three weeks. The flowers being fragrant and of such brilliant hue, are valuable for bouquets in the house and will last a week or more in a vase of water.

Has Bright Fall Coloring

In the fall of the year the leaves turn to a pretty gold and red color and liven up the landscape. The fruit usually hangs on after the leaves have fallen and is ornamental.

Dwarf Growing

Fine as Low Hedge

For a low, hardy, flowering hedge none can excel the Siberian Flowering Almond. Plant them 12 to 18 inches apart. The plants may be pruned severely and will form a matted flowering hedge of 12 to 18 inches in height. Or if left untrimmed will form a beautifully symmetrical, natural hedge of about three feet in height.

Good in Border or Groups

In border or group planting Siberian Almond's beauty is at first apparent by contrast. As it is the first shrub to bloom in the spring it lightens up the other shrub plantings and is in bloom till they show their flowers. Plant them freely in front of the larger shrubs for their early spring beauty. And in front of the Almonds plant tulips, crocus and perennials and you will have flowers all season.

PRICES FOR STRONG TRANSPLANTED BUSHY PLANTS FOR GROUP AND SPECIMEN PLANTING

Size	Each	Per 10	Per 25	Per 100
Small	\$0.35	\$3.00	\$6.50	\$25.00

Large	0.75	6.50	13.50	50.00

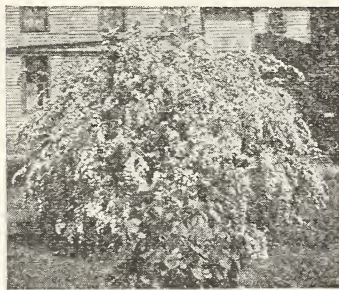

Plant in Front of Taller Shrubs

Hedging Stock of Siberian Almond

Siberian Flowering Almond is of special merit as a low hedge since it is of dwarf habit and requires little care to keep it in a compact attractive condition. And its price makes it the cheapest low hedge you can buy.

Hedging Stock: 10 Plants \$1.25; 25 Plants, \$2.50;
100 Plants, \$8.50.

A Splendid Ornamental of Great Worth

Spirea Van Houtte

A Fine Combination

Spirea V. H., Siberian Flowering Almond and Spirea A. W., make a wonderful foundation or grouped shrub planting. They bloom, first the Almond, then the Spirea V. A., next the Spirea A. W., for the rest of the summer. Their difference in size allows a graduation in planting, — the Spirea V. H. to the back, then the Almond, and then the Spirea A. W. in front. Order these three and have flowers from early spring till late Fall.

OTHER ORNAMENTALS

To Beautify Your Home

SPIREA VAN HOUTTE—The most popular of the spring blooming shrubs. A wonderful wealth of fine white flowers in early spring which are ideal in shrub planting, and make a beautiful flowering hedge. Hardy everywhere and at present the most widely planted ornamental shrub. Prices Are For Very Heavy Transplanted Shrubs:

Large Each \$0.75; 3 For \$2.00; 6 For \$3.50; 12 For \$6.50
Medium Each .50; 3 For 1.25; 6 For 2.25; 12 For 4.00
Small Each .35; 3 For 1.00; 6 For 1.75; 12 For 3.00
Hedging Stock \$1.75 Per 10; \$3.00 Per 25; \$11.50 Per 100

SPIREA ANTHONY WATERER—A dwarf Red Flowering, summer blooming Spirea, very fine for border work and low hedges. Blooms almost continuously from Mid-June till frost, with flowers in bouquet clusters and somewhat fragrant.

SPIREA CALLOSA ALBA—Similar to Spirea A. W. in habit, but with white flowers in panicles.

SPIREA SORBIFOLIA—A beautiful fern-leaved shrub with huge clusters of fragrant white flowers, coming into bloom in late July.

SNOWBALL—A most showy shrub which is covered in early spring with clusters of large flowers resembling balls of snow.

MOCK ORANGE—A Delightfully fragrant flowering shrub, which blooms after the lilac and Spirea V. H. Tall growing.

JAPANESE BARBERRY—A dwarf shrub with pretty foliage which has small yellow blossoms, followed by red berries. Fine in border work and low hedge.

HYDRANGEA P. G.—Has enormous white panicles of flower clusters which blossom in late June and July.

ELDER—Golden Elder or Cut Leaf Elder—Do especially well in the shade. The Golden Elder has beautiful golden foliage all summer, and the Cut Leaf has fern-like foliage.

LILAC—Common or Persian—The favorite old standby for its large and very fragrant blossoms. Common Lilac grows taller and more bushy, though the Persian Lilac does not sucker.

PRICES FOR ABOVE LISTED SHRUBS:

Small Size: Each 50c; Three \$1.25; Twelve \$4.00. Large Size: Each 75c; Three \$2.00; Twelve \$6.50.
Hedging Stock: \$2.50 Per 10; \$4.00 Per 25; \$14.00 Per 100.

HARDY ROSES

To many, there is no flower in the garden lovelier than a rose, yet, contrary to the opinion of many, they are easy to grow and their culture can be successful if the proper simple care and attention is given them. We sell only the hardiest sorts in each color. All double kinds.

Prices—By Color—Red, Pink, White, or Yellow: Each 50c; 3 for \$1.25; 6 For \$2.00; 12 For \$3.50.
Special Assortment—One Each Of Three Colors—Our Selection \$1.00.

CLIMBING ROSES

Red, Pink, White, or Yellow Climbing Roses, Not Completely hardy, and must be taken down in the winter. Each 75c; 3 For \$2.00.

HANSEN SIBERIAN ROSE

The plant is covered with beautiful blooms all summer long. The hardy rose for prairie homes. Each, 25c; Six For \$1.00.

TETONKAHA ROSE

Introduced by Prof. N. E. Hansen. A very choice flower and free bloomer. Flowers three inches in diameter, upwards to twenty-five or more petals, a deep rich pink. Hardy far north. Prices: Each, \$1.00; Six For \$5.00.

ARBOR VITAE

The best evergreen hedge. 3 yr. Plants. Each: 35c; 10 For \$3.00; 25 For \$3.50; 100 For \$25.00.

Vines and Ferns

ENGELMANN IVY

The hardiest of the climbing vines. Clings by means of sudopads to a sheer wall without the aid of lattice work.

Each 50c; Three For \$1.25.

CLEMATIS VINE

Jackmann's Clematis for summer vines with flower clusters. A light vine shade for porch or trellis.

Prices: Each 75c; 3 For \$2.00

HARDY OUTDOOR FERNS

The best for low shady places and to fill in the blank spaces in shrub plantings. Also are fine alone as a foundation planting. We have a number of varieties, all hardy and northern grown.

Prices: Each 50c; Three For \$1.00; Six For \$1.75; 12 For \$3.00.

Siberian Bush Honeysuckle

A splendid, tall, fine-foliaged, hedge plant. Is of added value because of its pretty pink and white flowers in the early spring, followed by masses of bright red and orange fruit, that are attractive to the birds. Also a fine specimen plant for both lawn and group plantings.

Prices For Strong Bushy Plants:

Size	Each	Per 10	Per 25	Per 100
18-24 inches	\$0.20	\$1.75	\$3.25	\$12.50
2-3 Feet	.30	2.50	4.50	17.50

Large Select Specimen Plants For Lawn Plantings
75c Each; Three For \$2.00; Six For \$3.50.

CARAGANA

THE HARDEST AND BEST OF HEDGES

Has a delightfully pretty, light green, fern leaved foliage, which grows very dense from the ground up. It has an abundance of bright-yellow blooms early in spring. If untrimmed Caragana will grow to height of twenty-five feet or more or it may be kept trimmed to any desirable height.

A Trimmed Hedge to Surround the Lawn

HARDY HEDGE ROSES—The Stately Beautiful Hedge

Nothing is more beautiful in hedges than a rose hedge. And nothing can be hardier than these Hardy Siberian Hedge Roses. They were introduced from Siberia by Dr. N. E. Hansen and have been developed by him for their beauty for years. The result is, we have a wonderful flowering hedge to offer which blooms all summer long from June till it freezes. The flowers are fragrant, large and beautiful beyond words.

With a hedge of these around your lawn you will have a flowering border of beauty to frame your place which will be a continual joy and everlasting pleasure thruout the years to come.

Buy them now and beautify your place beyond the hope of your fondest dreams. We have a fair supply but they will not last long for we are listing them at a very low price considering their wonderful value. So take advantage of the opportunity now and order a good supply to extensively plant them in hedges around your yard, and in shrubbery groups on your lawn and close to the house.

Prices For Large, Strong, Healthy Plants.

2 Year 18 to 24 In.—Each 15c; 10 For \$1.25; 25 For \$2.50; 50 For \$4.00; 100 For \$ 7.50
3 Year 2 to 3 Feet —Each 25c; 10 For \$1.75; 25 For \$3.50; 50 For \$6.50; 100 For \$12.50

SIBERIAN LAVATERA

A pretty flowering perennial brought by Prof. N. E. Hansen from Siberia. Flowers large, up to two and three inches across, single, and pretty lavender-shell pink. Blooms profusely all summer. Prices: Each, 50c; 3 For \$1.25; 6 For \$2.00; 12 For \$3.50.

PEONIES

The superb flower of the garden that holds sway with the most gorgeous array of glorious colored flowers, giving to the garden the effect of fairyland. Hardiest of perennials and will grow for years, almost anywhere with scarcely any care or attention.

Prices For Strong 3 to 5 Eye Divisions. By Colors: Pink, Red, or White, 50c each; 6 for \$2.50; 12 for \$4.50.

3 Assorted Peonies.....\$1.25; 6 Assorted Peonies, \$2.00
12 Assorted Peonies\$3.50

IRIS

One of the hardiest of perennials and one in which you can get so many rare blooms of choice colors, blooming in all their loveliness at a time when there are few flowers in the garden. Every garden should have Iris, and our collection will give you a choice assortment of the best varieties.

Collection Of The Best Assorted Large Iris: 12 For \$1.00; 25 for \$1.75.

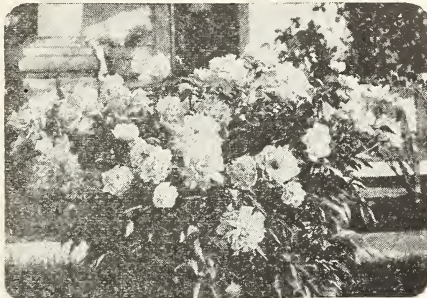

SPECIAL! Iris Pumila Dwarf. Early Bright Blue, For Border Work, Walks, or Drives. 12 For 25c; 25 For 35c; 100 For \$1.00; 1,000 For \$8.50.

HIGH GRADE SEED CORN

Hansen Yellow Dent

depth, and the cob is red. It is almost a sure crop. It is high in protein and a mighty good feeding corn. Prices: $\frac{1}{2}$ Bu. \$2.50; 1 Bu. \$4.50; 10 Bu. \$40.00.

Picked Early—Properly Dried
Shelled and Graded—High Germination

HANSEN YELLOW DENT

This is a variety of corn of our own, on which we have worked and improved for years. It is somewhat similar to Minnesota 13, or Early Murdock, but will outyield either of them, and is earlier to mature.

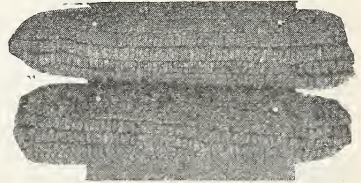

The prime factors kept in mind in the development of this corn were first of all early maturity, for unless a corn matures properly year after year, it has little real value. And secondly to get a yellow Dent corn that would outyield all other yellow dents. So this—our Hansen Yellow Dent Corn, is what we have to offer after our years of research, development, hybridization, and selection.

We highly recommend this corn for general planting be it for silo, feed, hogging off, or for market. Hansen Yellow Dent has a good yellow color, well dented, good depth of kernel, and large ears, which come at a handy height from the ground. The stalks are large, strong and succulent.

We have only a fair supply of this corn this year, so it will be well to order your requirements early. Prices: 1 lb. 25c; 10 lbs. \$1.50; 25 lbs. \$3.50; 1 Bu. \$6.50.

Minnesota No. 13

A good early yellow dent corn. Kernels are dark yellow, of medium

Minnesota No. 13

75-DAY YELLOW DENT CORN

Another of our own improved corns. Cross of an early yellow dent corn and an early yellow flint. The result after much selection and trial is a real yellow dent corn that will mature along with the flint corns. It is well dented, and of good yellow color. Ears well off the ground. Especially good for the northern and western part of this state. We have but a very limited quantity of seed to offer this year. Prices: 1 lb. 50c; 10 lbs. \$2.50; 25 lbs. \$5.50; 1 Bu. \$10.00.

NORTHWESTERN DENT

One of the best corns for hogging off as it is early to mature, real productive, and within easy reach of the hogs. Yet the ears are not so low to the ground as to be hard to pick. Prices: $\frac{1}{2}$ Bu. \$2.75; 1 Bu. \$5.00.

GOLDEN SUNRISE SWEET CORN

A new delicious golden sweet corn with the Golden Bantam flavor and two whole weeks earlier. It even beats the Sunshine, heretofore the earliest yellow sweet corn, by a number of days. It took 15 years to develop this sensational early corn. Remember its three big points,—large size, delicious flavor, and extreme earliness. You will have the first sweet corn for market and table in your neighborhood. It will make you good money and we highly recommend this variety.

Prices: Per Large Packet 15c; Per lb. 45c; 5 lbs. \$1.75; 10 lbs. \$3.00; 25 lbs. \$6.50; 50 lbs. \$11.50; 100 lbs. \$20.00.

WHITE CAP DENT

One of the best yielding corns grown in the northwest. But due to its color, which is a mixed bright yellow and red with a white cap, is not a good corn for the market. However, it makes a large growth of stalk and the yield is always good. The ears are very large, long, and the kernels quite deep.

An excellent corn for hogging off and for home feeding, and is usually surer to yield year after year than any other dent.

Prices: $\frac{1}{2}$ Bu. \$2.25; 1 Bu. \$4.00; 10 Bu. \$35.00.

White Cap Dent

COSSACK ALFALFA

The Greatest Of Them All!

Prof. N. E. Hansen's Wonder Plant

This variety of alfalfa is well known to all. It is perhaps the greatest of forage plants, and every farm should have a pasture and hayland of it. There are a number of alfalfas grown, but Cossack is the marvel of them all in hardiness and forage production. It is absolutely hardy on the most exposed prairie, and does well and produces an abundance of forage and seed in the driest of years. It will outyield other varieties of alfalfa and is harder than any of them. Prof. N. E. Hansen, the plant wizard, introduced this alfalfa from Siberia where he traveled extensively in search of hardy plants. He has added millions of dollars of value to the farms of the northwest by this one kind of alfalfa—Cossack. Plant 8 to 12 pounds to the acre for a solid field of alfalfa or less per acre according to the percentage you want in a mixed pasture.

Prices: 1 lb. 75c; 10 lbs. \$3.50; 25 lbs. \$12.50; 100 lbs. \$45.00; 150 lbs., One Full Sack, \$65.00.

GRIMM ALFALFA

A good alfalfa tho not as hardy as Cossack. For farther south and east it is claimed that Grimm will produce more hay than Cossack, but it will not stand the cold and drouth like the Cossack.

Prices: 1 lb. 65c; 10 lbs. \$5.50; 25 lbs. \$10.50; 100 lbs. \$40.00; 150 lbs., One Full Sack, \$57.50.

COMMON ALFALFA

All right for conditions that are not extremely dry or cold if it is northern grown seed. Produces a good crop of forage and as a rule will withstand as much cold and drouth as Grimm.

Prices: 1 lb. 49c; 10 lbs. \$3.50; 25 lbs. \$7.50; 100 lbs. \$27.50; 150 lbs., One Full Sack, \$40.00.

SIBERIAN SWEET CLOVER—Often Called Arctic Sweet Clover in Canada

Introduced by Prof. N. E. Hansen in 1913 from the dry Semipalatinsk region of Siberia. It is a tall growing clover, making an astounding growth in one year, very succulent stems. A much better hay than our common sweet clover. Prices: 1 lb. \$1.00; 10 lbs. \$7.50; 25 lbs. \$12.50; 100 lbs. \$35.00.

Prof. N. E. Hansen and a Single Plant of Cossack Alfalfa.

PROSO

The Best Catch Crop For The Northwest

Hansen Proso was introduced along with many other varieties of Proso from Siberia by Prof. N. E. Hansen. It was then selected for white seed, large kernels, and the greatest productiveness.

It is extremely valuable as a catch crop even for the north, as it will mature in 60 days and may be sown after other crops are planted even after a field shows signs of failure. Though it does best when sown in late June, it may be sown in July and still mature a good crop of grain. It often yields 300 fold of good clean grain, weighing 60 to 64 pounds per bushel.

The seed is round and several times the size of ordinary millet. It grows in a sprangly head, resembling oats. The color of the inner kernel of grain is white, suitable for feeding whole or ground. It is very valuable as a fattening grain for hogs as well as a good general feed for cattle, horses, and chickens. The U. S. Dept. of Agriculture in their Proso Bulletin give many valuable statistics in this regard. When hulled and ground Proso may be used as a breakfast cereal, similar to wheat or rice, or as a flour in breads and other pastry. Sow 15 to 25 pounds to the acre.

Prices: 1 lb. 25c; 10 lbs. \$1.00; 25 lbs. \$1.75; 100 lbs. \$5.00; 250 lbs. \$10.00.

One Bundle Of Proso Grown in Western S. Dak.

SPECIAL!

10 Pkts. of Vegetable and 10 Pkts. of Flower Seeds.....\$1.00, Prepaid.

LAWN SEED—A good mixed lawn seed is the best for the establishment of a good permanent lawn. Our seed is especially prepared mixture of choice kinds of grass to insure a good quick-showing—yet lasting lawn. 25 lbs. will properly cover the average lot, and should be sown early in spring, on a well pulverized soil, using most of the seed and saving some to sow on later in the summer and fall in the spots where it did not catch at first. Be sure to sow on a still day, preferably just before a rain.

Prices: 1 lb. 40c; 5 lbs. \$1.75; 10 lbs. \$3.25; 25 lbs. \$7.50; 100 lbs. \$27.50.

SIBERIAN FLOWERING CRAB

The Superb Beauty Of Ornamentals

In All Its Springtime Glory

Shade Tree — Fruit Tree

The new and improved Siberian Flowering Crab or *Pyrus Baccata*, from the cold dry regions of Siberia is a commendable tree for ornament and utility. It must be seen and used to be fully appreciated.

Gloriously Beautiful

Its glorious, gorgeous, early spring magnificence adorned in an avalanche of large pink and white flowers of superb fragrance begins its alluring loveliness. This unquestionably makes it both a fine specimen ornamental for the lawn and wonderful as a street tree. Used in a windbreak, it gives the whole place a living frame of beauty.

For The Lawn Or Boulevard

The blossoming is followed by a mass of dense, bright green foliage, covering heavily shouldered and wide spreading branches, thus making it a fine shade tree for the street or lawn. This fine, heavy foliage of the Siberian Flowering Crab, which has a tendency to be cut-leaved, forms a huge canopy of living green for many delightful summer lawn parties and picnics.

A Fine Fruit Tree—Bears Early

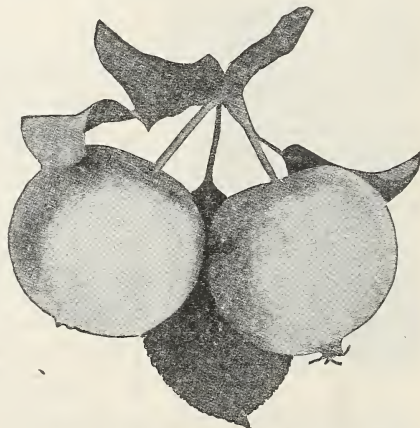

Then comes the bright red and yellow fruits which can be used for eating, jelly, or pickling, or are best pressed out and the juice added as the desired flavor in other fruit jams and jellies to bring out their full value. The juice also makes remarkable cider. The tree usually bears when about three years old.

A Beautiful Windbreak Background

Being of such a well built nature with staunchly branched limbs and with such a fine heavy network of branches, it makes a splendid tall windbreak and blizzard break when planted close together in rows and its early spring flowers will make your whole grove a glorious flower garden, then later on a good fruit orchard. Yet because of its very low price it is in line with the most common trees, and it may be used as needed protection and abundant beauty in one or two rows of your windbreak.

Sturdy—Disease Resistant

The tree itself grows to a good height and lives long. Its growth is rapid, sturdy, and vigorous. It is very drouth and disease resistant and because of its origin is absolutely hardy everywhere. Siberian Flowering Crab does well on the poorest soil, growing for years with scarcely any care or attention.

Fruit Fair Size And Good Flavor.
Makes Fine Jams, Jelly or Cider.
